

## Identifying Functions

A **function** assigns each input to exactly one output. Determine if the following **relations** are **functions**.

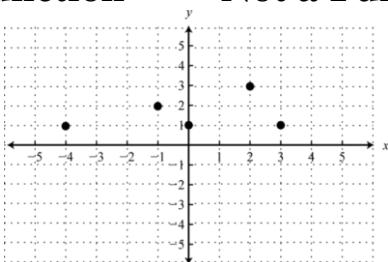

### 1. Function      Not a Function

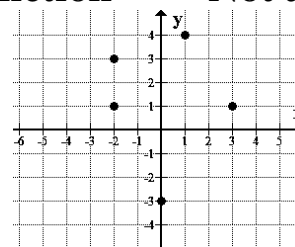

### 5. Function      Not a Function

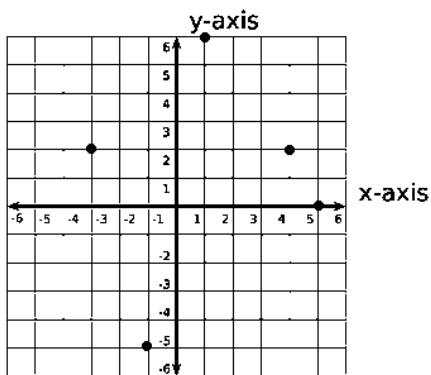

### 2. Function      Not a Function

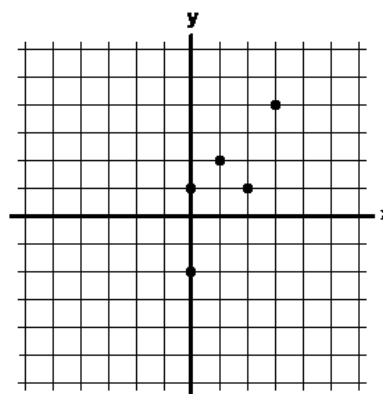

### 6. Function      Not a Function

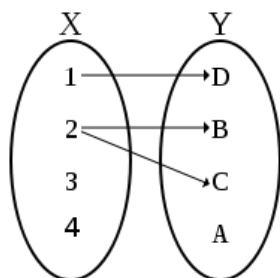

### 3. Function      Not a Function

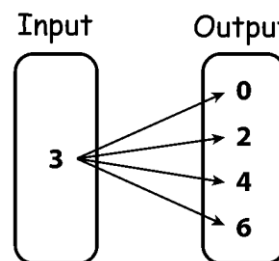

### 7. Function      Not a Function

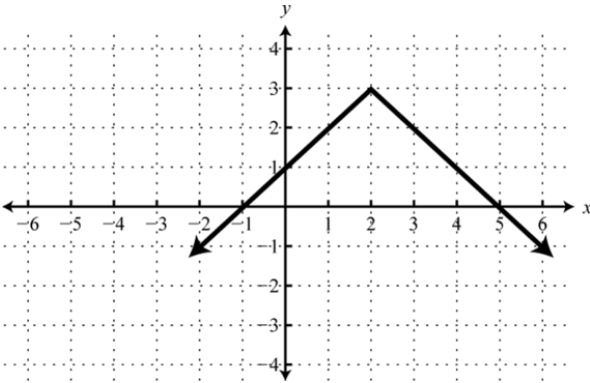

### 4. Function      Not a Function

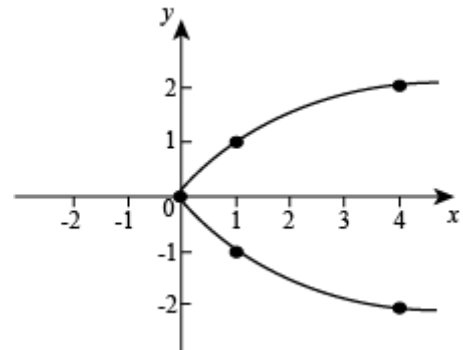

### 8. Function      Not a Function

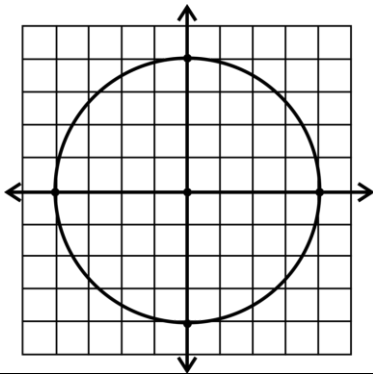

**9. Function**      **Not a Function**

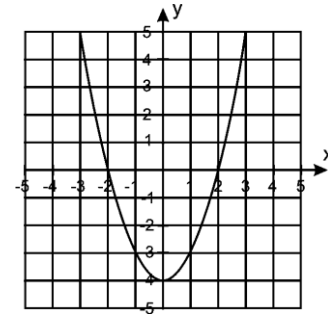

**13. Function**      **Not a Function**

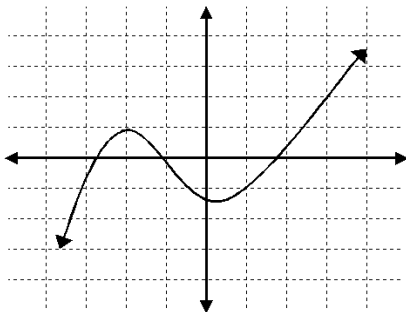

**10. Function**      **Not a Function**

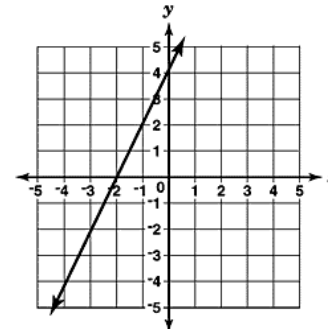

**14. Function**      **Not a Function**

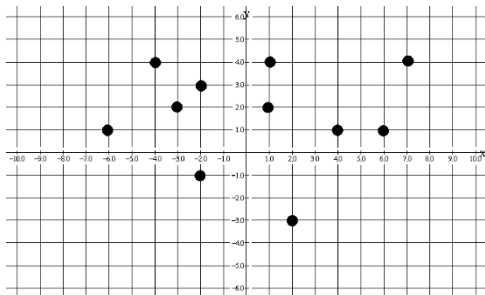

**11. Function**      **Not a Function**

**15. Function**      **Not a Function**

**12. Function**      **Not a Function**

**16. Function**      **Not a Function**
