

Public Pages

Each group you create includes a public page that's accessible by selecting the "public page" link on the right panel of your Edmodo homepage. Selecting the public page link will automatically open up a new tab in your browser with the group's unique URL, and will display any posts from the group that are marked "public".

Please note that by default, everything posted in your Edmodo group is private, and viewable only by the members of the group. To make a post within your group public, select the "public" link located in the drop-down arrow options for the individual post. It will now be visible from the group's public page. To **remove a public post**, click the red "X" next to the "Public" link.
