

VIRTUAL LEARNING Geometry

Week 2

***CHANGE!** Please note that I will be giving you assignments rather than posts going forward. It is the only way for me to accurately keep tabs on your participation. I know some of you are concerned about not actually needing to submit anything so we can take care of that in 3 ways

- 1) Submit a comment telling me what you did or didn't understand about the lesson
- 2) Submit a blank submission
- 3) If assignment comes up as "late" click on it and hit "mark complete"

This is the packet for Unit 11. You will be using this as a guide for your notes. You do not need to print this entire thing, feel free to print the notes pages only or just copy the notes onto a separate sheet of paper or graph paper.

 [2020 packet.pdf](#)

This is the answer key to the packet. Please check your answers with mine and message me with any questions or clarification needed. Please do not check until you have attempted and completed everything you can ON YOUR OWN first!
